

Oral Surgery for the General Dentist: Making it Easier, Faster and More Predictable

Date: November 3-4th, 2017

Presenter: Dr. Koerner is currently Director of Oral Surgery for Intermountain Dental Associates in Utah. He is also an Adjunct Professor in Oral Surgery at Roseman University of Health Sciences, College of Dentistry in Utah. His clinical dental treatment is limited to oral surgery which he performs in several offices. He is not an oral surgeon but received surgery training in the U.S. Army where he completed a general practice residency. He has a Masters Degree in Education.

Dr. Koerner is the author of many articles on various aspects of oral surgery for the general dentist and has authored or co-authored four books on oral surgery. In addition, he has made several DVDs on surgery with Dr. Gordon Christensen. He is past president of the Utah Dental Association and Utah Academy of General Dentistry. He has received the National AGD's Weclaw award for his contributions to dentistry and dental education and also the Utah Dental Association's Distinguished Service Award.

Dr. Koerner has presented hundreds of didactic and participation oral surgery courses in the U.S. and around the world. He speaks about twice a month at dental meetings both large and small. In the last few years, he has organized 15 dental humanitarian trips to China and enjoys studying and speaking Mandarin Chinese.

Description: This course is for doctors with little to no experience with bone grafting. Many extractions look easy but can soon become difficult, time consuming, and lead to problems. This course reviews the best techniques and instruments to remove "surgical" extractions easily and quickly while conserving bone. It makes exodontia more enjoyable and predictable so it can be performed with greater confidence and less stress.

Along with surgical extractions, it covers multiple extractions and ridge preparation for immediate dentures, avoiding or managing common surgical complications such as sinus misadventures, excessive bleeding, and tuberosity fractures. Also included is predictable socket bone grafting, and other related topics as time permits.

Location: This course will be held at the Center for Tissue, Innovation and Research in Kettering, OH

Hotel: A block of rooms have been reserved under "Maxxeus Training Course" at the Courtyard Marriott in Beaver Creek, Ohio. To reserve a room, please call 937-429-5203 or visit maxxeusdental.com to book online. Rates will be available up to one month before event.

Please complete this form to register for the course.

You will receive an email confirming your reservation for the training course.
